**DETAILED ACTION*****Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 4-6, 10-20 and 29 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,996,067 to Burke et al.

As concerns claims 1 and 12, a gateway (50); a switch (40); a data routing system (figure 3); a bandwidth measurement device (60) configured for independently determining upload or download data transfer rates between said remote client/terminal (column 3, lines 50-53) and said gateway, and for distinguishing the upload or download data transfer rate between the remote client and the gateway from the upload or download data transfer rate between the remote client and the network (column 5, lines 26-30); a measurement application (column 3, lines 34-41) resident on said bandwidth measurement device, said measurement application determining said upload or download data transfer rates for said bandwidth measurement device; and an applet (column 3, lines 54-61) maintained by said measurement application suitable for download to said remote client; configured for independently determining upload or download data transfer rates between said remote client and said gateway, wherein determining said upload data transfer rate between said client and said gateway, said downloaded applet generates said data packets (column 4, lines 32-39) originating at said remote client and determining said download data transfer rate between said gateway and said remote client, said downloaded applet

Art Unit: 2151

determines said download data transfer rate based upon an analysis of said data packets generated by said measurement application upon arrival at said remote client (column 4, lines 32-39).

As concerns claims 2 and 13, a router (50).

As concerns claim 4, an ATM edge switch (40).

As concerns claim 5, a service node is an internet service provider (column 2, line 19) and said network is the Internet (column 2, line 19).

As concerns claims 6 and 16, a server (column 4, line 18-test server).

As concerns claims 10, 18 and 20, wherein a web application resides on said bandwidth measurement server, said remote client accessing said measurement application via said web application (column 5, line 35).

As concerns claims 11, 19 and 20, wherein said bandwidth measurement server further comprises a measurement database (column 3, lines 40-41) coupled to said measurement application, said measurement database maintaining data collected during measurement of said upstream and/or downstream data transfer rates.

As concerns claim 12, a service node (figure 3; 42, 52, 40, 50, 60); subscriber terminals (figure 7; 12); xDSL lines (column 1, line 66); the gateway coupled to the Internet (column 2, line 19).

As concerns claim 14, said bandwidth measurement device is coupled to a gateway (50; figure 3).

As concerns claim 15, a service provider terminal (column 6, line 65) and said bandwidth measurement device is coupled to the router (figure 3; coupled via the communication connections of the network).

As concerns claim 17, a measurement application (column 3, lines 34-41).

As concerns claim 29, the upload or download transfer rate is compared to the baseline data transfer rate to determine if problems exist (abstract last 4 lines).

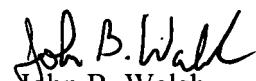

***Response to Arguments***

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
